THE BREHMER AGENCY, INC.

Bonding & Insurance

The value of an asset is its market value or determined in accordance with generally accepted policies or other generally accepted methods.

The amount of any liabilities of an insured is determined by the amount of any accepted accounting concepts, based on the facts and circumstances appropriate for insurers.

The value of any assets of the insured is determined by the market value of the assets which are matched to the liability value of that asset.

Construction Industry Specialists

Agency Profile

Established in 1980 by Randy L. Brehmer, our company has grown into a full-service insurance and bonding agency.

Currently, The Brehmer Agency serves the insurance and surety bonding needs of over 500 clients in the Greater Milwaukee area and the surrounding counties.

A Professional Agency With Personal Service

At The Brehmer Agency, we understand that customer service is of the utmost importance to our clients. Any licensed agent can provide insurance and bonding, but few can match our client focused customer service.

When you call our office, you will speak with an actual person, not a recording. We have experienced insurance and bonding professionals in the office who can assist clients with their questions or concerns.

While we represent a select group of stable and reputable insurance and surety companies, we work for you. We are here to assist and support our clients throughout the entire process. This means that we will design a protection package that meets your needs. We will assist you with the prevention of losses to keep premiums down. Finally, we can help develop strategies to manage losses when they do occur.

Our customer service is unsurpassed and is one of the biggest reasons that we are able to maintain long-term relationships with our clients.

Surety Bonding Services

Any licensed insurance agent can handle surety bonds. However, it takes specialized expertise and experience to get you the bonding required, when you need it.

Our knowledge of the surety markets and experience allow us to forge long term relationships with contractors and sureties, and to provide surety credit at rates that are often lower than the market average.

The central issue in surety bonding is one of trust, trust between surety and the contractor and trust in the bonding agent. Our experience, professional reputation and expertise offer you the service, capacity and competitive rates that you need.

Insurance Services

We specialize in providing insurance to contractors and construction companies at very competitive rates. We have several insurance markets to meet your needs.

Once we place your insurance, our service is just beginning. We review contracts to ensure that you have all the necessary coverage limits and will assist in negotiations if insurance requirements are unreasonable or extraordinary. Additionally, we are able to assist your organization with claims management and participate in all claims reviews. This extra attention will limit exposure and control insurance costs.

Safety and Loss Control Services

One of the most effective ways to control costs is to have a safety and loss control program in place. We have a Safety Professional on staff to assist our clients with any safety issues including but not limited to:

- Safety program review or development
- Safety training including OSHA 10-hour construction courses
- Job site audits
- Personal protective equipment review
- Workers compensation claims management strategies
- OSHA citation abatement
- Fleet safety issues

This service is provided to our clients at minimal or no additional cost. By taking advantage of these services, loss ratios can be driven down. This results in a more favorable rating with insurance companies and most importantly to our clients, reduced premiums.
